

1 – Ao fazer login o botão de entrar fica aparecendo, enquanto deveria aparecer o perfil do usuário que está logado na sessão.

2 - Ao tentar editar um usuário aparece esse erro

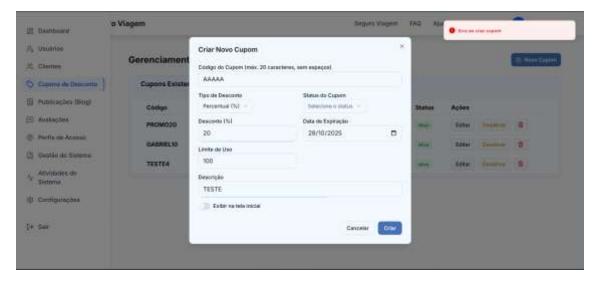

3 – Ao tentar desativar o usuário que está na atual sessão do sistema ele permite

4 – Ao tentar criar um cupom sem selecionar o status, aparece esse erro:

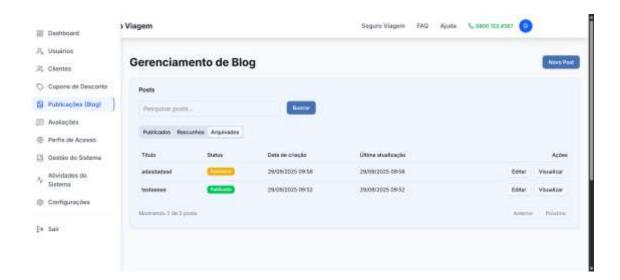

Obs: Tratar a mensagem de erro e também já setar como cupom ativo ou permitir que cupom inativo seja criado.

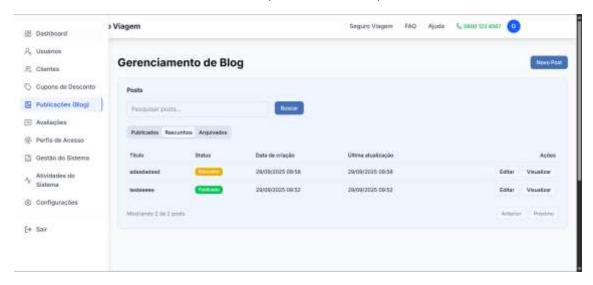

5 – ao selecionar a aba de arquivados, continua a aparecer todos os posts

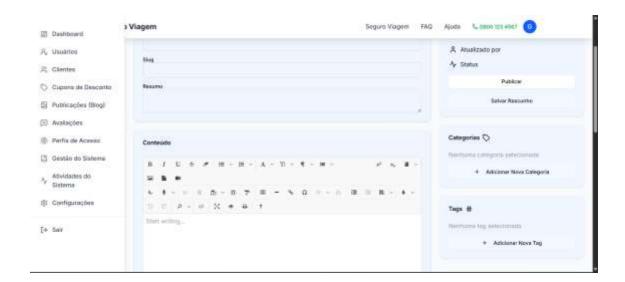

6 - Ao selecionar rascunho, continua a aparecer todos os posts

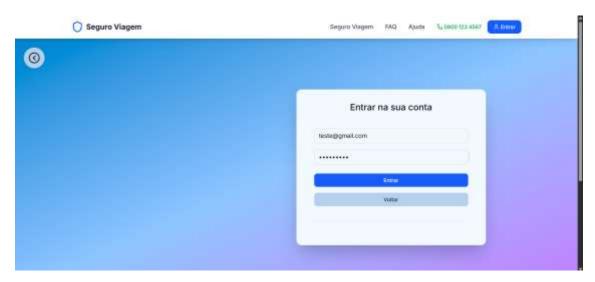

7 – o menu lateral precisa ser tratado para não ficar sobrepondo o sistema

8 – Ao tentar logar com cliente nada acontece, deveria pelo menor autenticar e enviar para os dados mockados

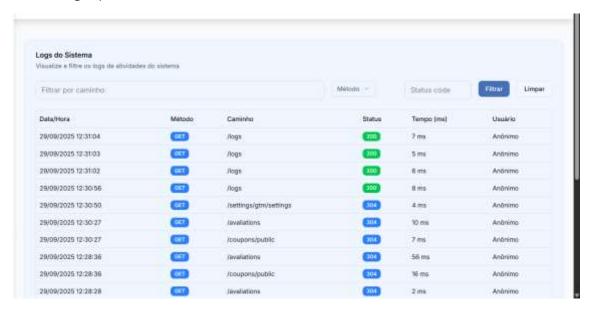

9 – A tag do google tag manager não aparece no header e na abertura da tag body

```

10 – Os logs aparecem usuário como anônimo

11 – Tratar página ao tentar criar uma nova página de termos e condições sendo que já existe uma, precisa mostrar a mensagem correta de erro ou nem permitir criar.

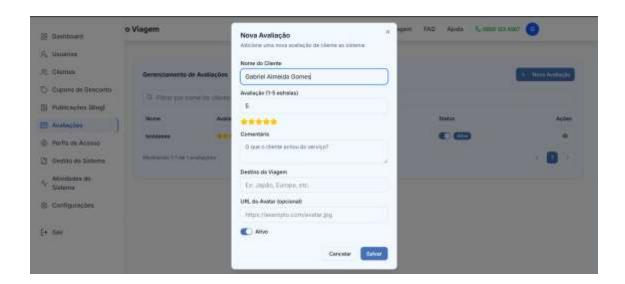

12 – Ao abrir para editar página de politicas, vem setado termos. Além disso está permitindo salvar sem título.

13 – Aqui deve solicitar que seja feito o upload da imagem e não o link como está

14 – ter a opção de excluir feedback
